733LW Lever Action Grips

25 N Capacity

Extremely Lightweight, 25 N (5 lbf) capacity. Their lightweight design (only 75 grams) minimizes the hanging weight on the load cell, which enables the use of lower force load cells. These grips feature round jaws with dual action to automatically center your sample.

These 733LW grips are designed to hold extremely lightweight materials like tissue for tensile testing.

Grip Specifications:

- Capacity 25 N (5 lbf)
- Length 6.35 mm (.25 in)
- Upper Grip Wight:
  0.075 kg (0.17 lb) 101 mm (4.0 in)
- Maximum Sample Thickness:
  50.8 mm (2.0 in)
- Pneumatic Grips
